

Why I'm here:  
**Debilitated & Fibropapillomatosis**

Patient : Benny  
Species : Green  
Latin Name: *Chelonia mydas*  
Age : Juvenile  
Gender : unknown  
Weight : 5.20 kg/ 11.44 lbs  
Found : Atlantic Beach, FL  
Arrived : March 9, 2013  
Rescued by : Leslie Methuin, Sea  
Turtle Patrol

#### Exam Findings:

Lethargic  
Couple large Barnacles & Bryozoa on  
carapace  
Presence of raised FP lesions

#### Diagnostics:

Blood Work: Mildly low blood protein,  
severely low albumen, evidence of muscle  
exertion, calcium/phosphorus imbalance

X-Rays: normal

CT scan: no internal tumors present

#### TREATMENT FOR: Benny

IV Fluids: LRS+dextrose, Vitamin B  
Calcium Gluconate  
Ceftazidime: antibiotic for aerobic  
bacteria

Metronidazole: antibiotic for  
anaerobic bacteria

Shana: a neutraceutical for herpes-  
virus (FP) given orally & topically

PRESCRIBED: DR. NORTON, DVM  
(MAY BE PREVIOUS OR CURRENT)

#### Update:

Benny had laser surgery to remove his/her FP  
tumors. During surgery we removed 20-25 tumors.  
Currently treating areas as open wounds by  
applying Silver Sulvadine (SSD) cream.

Current Weight:

888 LBS
