

Why I'm here:  
**Cold-Stunned**

Patient : Karma  
Species : Loggerhead  
Latin Name: *Caretta caretta*  
Age : Sub-adult  
Gender : Unknown  
Weight : 120.8 lbs / 54.8 kg  
Found : Blackbeard Creek  
Arrived : December 10, 2010  
Rescued by : Local Fisherman / Georgia DNR

### Exam Findings:

Moderate to heavy epibiota load  
Underweight  
Low body temperature (55.7° F)

### Diagnostic Results:

X-rays: Normal  
Blood work: Anemic

### TREATMENT FOR: Karma

Cisapride: Gut motility (no longer necessary)

Dewormers: Biltricide

(Praziquantel), Fenbendazole

Amikacin: Antibiotic (no longer necessary)

Iron supplements: Anemia has resolved and PCV is at low normal level

PRESCRIBED: DR. NORTON, DVM  
(MAY BE PREVIOUS OR CURRENT)

### Update:

Karma is now swimming in normal water temperature (~75° F.) He/she is still slightly underweight and eating three times a day until enough weight is gained.

Current Weight:

**888** LBS
