

Why I'm here:  
**Fibropapillomatosis (FP) / Floating**

Patient : **Tim**  
Species : Green Sea Turtle  
Latin Name: *Chelonia mydas*  
Age : Juvenile  
Gender : Unknown  
Weight : 36.5 lbs / 16.6 kg  
Found : St. Simons Island, GA  
Arrived : May 21, 2011  
Rescued by : Georgia DNR

### Exam Findings:

Small FP  
Floating  
Old boat strike injuries  
Small barnacle load

### Diagnostic Results:

Blood work: Normal  
X-rays: Gas and feces in GI tract;  
Barium beads moving slowly through GI tract;  
delayed gut motility

### TREATMENT FOR: Tim

Ceftazidime: Antibiotic  
Danafloxacin: Antibiotic  
Metronidazole: Antibiotic  
Cisapride: Gut motility  
Saline: Enema  
Feeding tube placed in esophagus

PRESCRIBED: *DR. NORTON, DVM*  
(MAY BE PREVIOUS OR CURRENT)

### Fun Fact!

Green sea turtles get their name from the color of their fat. They get this way from eating greens!

Current Weight:
